

# hanit – safe products for kids & teens

[www.hanit.de](http://www.hanit.de)

Carefree  
playtime!

## Benefits at a glance

### A smart solution for people and the environment

#### ○ Maintenance-free & weatherproof

Wind and weather does not faze hanit, as it is weatherproof and weather-resistant and can be used outdoors all year round. It repels moisture, does not absorb water and is therefore quick-drying. hanit is rot-proof and can also be used directly in or on the ground. It does not need to be impregnated, painted or maintained.

#### ○ Environment-friendly & non-toxic

hanit is free of toxins and harmful substances in accordance with DIN EN 71-3 (European Standard for Toy Safety). Laboratory tests also confirm the 100% food conformity of hanit. hanit is produced without impregnation, relieves pressure on landfills and sustainably protects the environment due to its 100% recycled plastic content.

#### ○ Easy to work with: drilling, sawing, screwing, nailing

hanit is easy to work with and use. So on-site adjustments are no problem. Its low weight means it is lighter than stone or concrete and can therefore be better transported, lifted and positioned in the shoring. hanit can be sawn, milled, drilled or planed with conventional tools if required and is reminiscent of working with wood. But, unlike wood, hanit does not splinter.

Our raw material – hanit pellets, made from perishable packaging materials

hanit is used to make a wide range of around 2,000 products. We are happy to send you additional themed brochures with even more interesting products.

 Colourful and sustainable

# Carefree play with hanit

## Safe, robust, great for children: for sustainable playtime

Splinters, rotten beams, sharp or rusty metal edges – sometimes the danger isn't recognised until it is too late. This is why playgrounds are subject to special safety requirements. The material that they are made of is especially important in this regard. It has to protect little whirlwinds and boisterous toddlers, and also be hard-wearing and weatherproof at the same time.

hanit fulfils these criteria. On the one hand, our material forms the basis for all of the nice things that constitute a playground: Sand boxes, benches and picnic benches, spiral herb planters and mud tables. On the other hand, the hanit palisades, round beams and footpath planks give you endless possibilities for playground design – from climbing hills to tunnels and balancing courses. Ideas which you can implement in an efficient and long-lasting way.

### 1 Palisades

Ideal as sand box edging or for supporting hills.

### 2 Footpath planks

As a platform or a terrace. Our planks are the ideal companion for gravel-free levels.

### 3 Sand boxes

Rectangular, hexagonal or in different colours – there's a wide variety of hanit sand boxes available.

### 4 Edgings

For large sand or play areas: Edgings made from hanit. Easy to lay, last for ever and always easy on the eye.

### 5 Construction materials

For building great obstacle courses or climbing areas.

### 6 Tables, benches & bench planks

We offer seating for kids and adults that comes in different sizes, colours and is suitable for almost anything.

### 7 Mud table

The mud table made from hanit invites you to play in the mud, splash around and discover.

### 8 Raised beds

Learn with hanit: The little ones can learn how nature works with our raised beds.

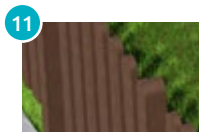

### 9 Composters

Understanding the natural cycle. The composter helps to teach children about sustainability at a young age.

### 10 Litter bins

Order and tidiness must prevail. Rubbish must always be put into the bin, even at the playground.

### 11 Fence posts and pales

We offer a range of fence components for creating custom solutions to ensure the kids stay safe.

### 12 Privacy screen

Keeping away from prying eyes: our durable privacy screens also offer privacy in the kindergarten.

# Building and construction

More durable than wood, lighter than concrete

hanit ogee palisades are ideal for enclosing areas such as playing fields, sand boxes, paths, beds and ponds. They can withstand any weather and do not rot or splinter. They do not require harmful preservatives, and are water-neutral and maintenance-free. They are easy to process without heavy equipment.

## Ogee palisades

- Lengths: 60 to 200 cm, depending on the model
- Diameter: from 11 cm to 20 cm
- Full or hollow profile depending on length
- No rotting
- No splinters

Our hollow-profile palisades offer many advantages with just a slight change in strength:

- They are cheaper because less material is used.
- Less material means less weight, and therefore cheaper transport costs.
- Lighter weight means easier installation.

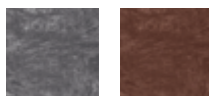

Our footpath planks have proven themselves on thousands of occasions when it is a case of making platforms, terraces and path safer in a simple way by using a moisture-resistant covering. The ribbing on the surface prevents slipping, particularly in areas when it can get damp.

## Footpath planks

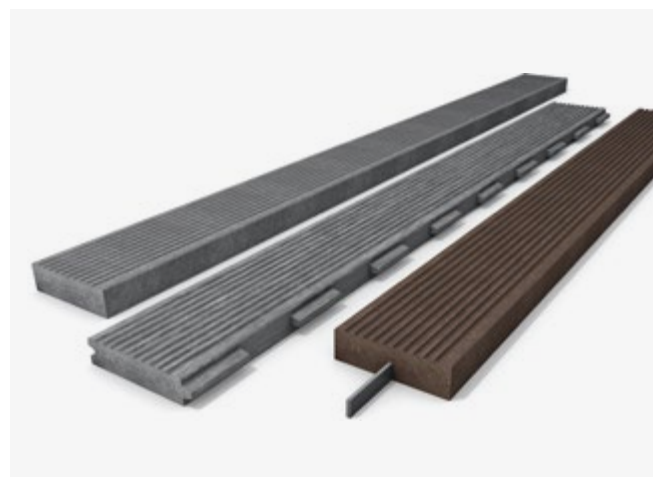

- Lengths: from 100 to 300 cm
- Thickness: 4 / 4.8 / 6 cm, width: 16.5 / 17 / 19.7 cm depending on the model
- Available with and without tongue and groove
- Anti-slip surface, moisture-resistant, no splinters
- Also available with steel reinforcement for increased spans

Available in the following colours:

grey

brown

## Making fantasy a reality

### The indestructible all-rounders

Climbing, somersaulting, hiding: regardless of the areas to be designed on playgrounds, schoolyards or leisure systems, hanit palisades are the uncomplicated elements which make the difference: low-cost, weather-resistant, long-lasting and without follow-up costs. All our palisades are available with a stable full profile or weight-saving hollow profile, depending on the dimensions and use. They are also lighter than concrete products. Not only does this make transport cheaper, but also makes installation in inaccessible areas possible without heavy equipment.

More than just a  
construction material

## Round palisades

Available in the following colours depending on the model:

grey

brown

Ideal for balancing courses

- Lengths: 60 to 280 cm, depending on the model
- Diameter: from 10 cm to 20 cm
- Full or hollow profile depending on length
- Stable and secure

## Rectangular palisades

Available in the following colours depending on the model:

grey

brown

anthracite

- Lengths: 60 to 150 cm, depending on the model
- Profile dimensions: 12 × 16 cm, 16 × 24 cm
- Many advantages compared to wood and concrete
- Water-neutral and rot-proof
- Easy to process

No need to worry about splinters or harmful weatherproofing substances

### Gobi sand box

- Sizes: 120 or 240 cm square each, height: 31 cm
- Seat surface: 14 cm wide
- Easy to assemble
- Compact size makes it ideal for small spaces

Available in the following colour:

brown

### Namib sand box

- Sizes: 200, 300, 400 or 500 cm square each, height: 31 cm
- Wide edge for sitting and playing: 19 cm
- Easy to assemble
- Supplied as a construction kit, without base

Available in the following colour:

brown

### Kalahari sand box

- Diameter: 175 and 240 cm, Height: 31 cm
- Seat surface: 14 cm wide
- Easy to assemble
- Interesting shape

Available in the following colour:

brown

## Splinter-free digging fun

Discovering the world with all the senses

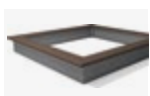

Playing in a sand box promotes discovery, imagination and creativity. To make sure kids can safely discover the world with all their senses, we use hanit for our sand boxes as an alternative to wood, concrete and steel. hanit is weatherproof, low-maintenance, UV-stable and robust, its corners and edges can be rounded and it will never splinter.

### Sahara sand box

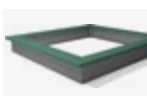

- Dimensions: 200 and 300 cm square, height: 27 cm  
Seat surface: 19 cm wide
- Weather-resistant and rot-proof
- Splinter-proof

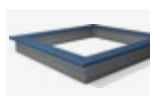

Available in the following colours:

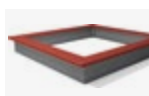

grey / brown

grey / green

grey / blue

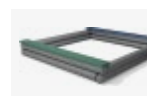

grey / red

### Dahna sand box

- Dimensions: 200 cm square each, height: 28 cm  
Seat surface: 17 cm wide
- Easy assembly (pre-installed)
- Permanently stable, even in direct contact with wet sand

Available in the following colour:

grey / blue / green

Available in two sizes for gardeners big and small

## Terra raised bed for children

- Dimensions (W x L x H): 90 x 190 x 63 cm
- Child-friendly height and no splinters
- Does not decompose, unlike wood
- Consists of just seven parts (construction kit without base)
- Adult height: 83 cm

Available in the following colours:

grey

brown

### Third layer

The top layer of dirt finishes the raised bed. Regular garden soil can be used here. Make sure it is applied thick enough for the plant to be able to grow in it completely.

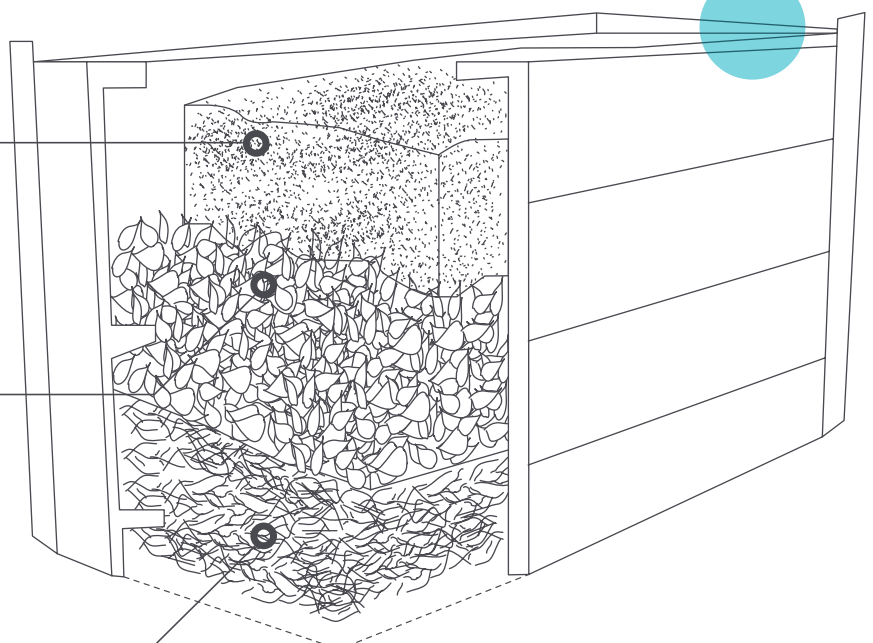

### Second layer

The middle layer of the raised bed provides plants with nutrients and consists of compost from the house or the garden, as well as lawn clippings and leaves. It should be about as thick as the bottom layer.

### First layer

The bottom layer should be made up of broken sticks and twigs. The loose structure allows air to enter from below, and it also functions as drainage so that excess moisture can flow away easily to prevent waterlogging.

Quick and easy assembly with pre-installed components

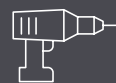

## Tool selection

### hanit is easy to work with

#### Sawing & Cutting

Using fast-running band and circular saws with slightly side-set teeth, preferably made of hard metal, an optimum cutting pattern is achieved. To avoid smearing the plastic, speedy chip removal is recommended. Length reductions can also be made using a chainsaw. A loss of accuracy must also be taken into account.

#### Drilling

Twist drills with an angle of twist of 20° to 30° and a point angle of 110° to 120° can almost always be used. Relaxation strokes should occasionally be used, especially with larger drilling depths, to avoid high frictional heat.

#### Planing

Electric planers are also suitable for use on plastics. The surface depends to a large extent on the rate of feed, cutting speed, clearance and rake angle and the condition of the blades.

#### Milling

Here, the chip cross-section should be as large as possible to keep the heat from machining relatively low. The cutting depth and rate of feed should be large whereas the cutting speed should be low. To increase the tool life, we recommend using milling cutters with hard metal indexable inserts.

#### Deburring

Angle grinders are not suitable for cutting work because of the high rotational speed. An angle grinder can, however, be used on plastic parts that have burrs or edges after machining.

## Processing tips

### Here's the best way to do it

hanit products can be processed using conventional wood and metalworking tools and machines if required. Due to the properties of the material, however, some special features need to be observed.

#### Nailing

hanit products can be nailed conventionally and using a nail gun. However, due to the compact surface, penetrating the profiles is more difficult than with wood. Please bear this in mind when fixing.

#### Support spacing

In contrast to wood or metal products, plastic is less rigid and more flexible. For support spacing in jetty, fence and terrace construction, these special material properties must be observed accordingly.

#### Hammering

If the profiles are hammered down, we recommend using a pile driver or edge protector to avoid damage to the product.

#### Length changes

Boards, sleepers and square profiles must not be press-fitted. The profiles may vary in length by +/- 1.5% due to temperature. An expansion gap must therefore be maintained during installation.

#### Documents

For many products and applications we have static verifications, installation recommendations and assembly instructions. You can find more information at [www.hanit.de](http://www.hanit.de) in the download section or directly from the relevant product.

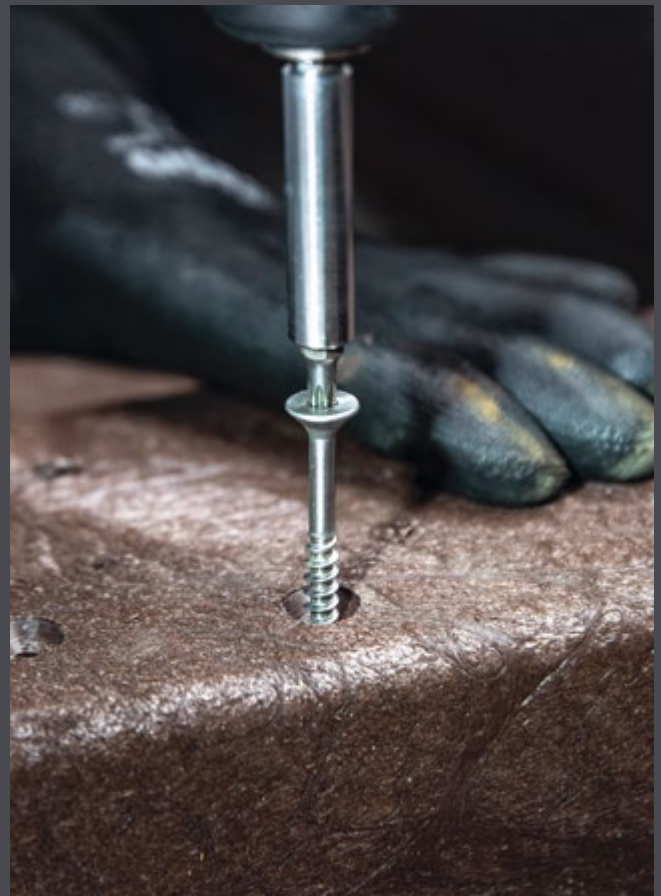

#### Screwing

If recycled profiles are to be screwed, the profile to be fastened must be pre-drilled (e.g. boards, footpath planks, square profiles). The drill hole must be bigger than the screw, elongated holes are recommended in order to take the temperature-related expansion behaviour of the material into consideration.

#### Alignment

Solar radiation affects the alignment of the profiles and can, for example, cause fence posts to lean.

# Keep having fun with mud

## No rot, no repairs with hanit

Kids love playing with mud – but when sand and water are combined with wood, the fun soon grinds to a halt. The wood quickly weathers and splinters. But hanit mud tables made from our unique recycled plastic are much more durable. They are also easy to assemble and can be combined flexibly.

More  
mud,  
more fun

## Mud table

- Tub dimensions (W × L × H): 60 × 150 × 11 cm
- Height from 29 cm to 92 cm depending on element (after installation)
- Buried feet
- Flow element: one water outlet,  
End table: two water outlets
- Weather-resistant and rot-proof
- Supplied as construction kit
- Elements are also available separately

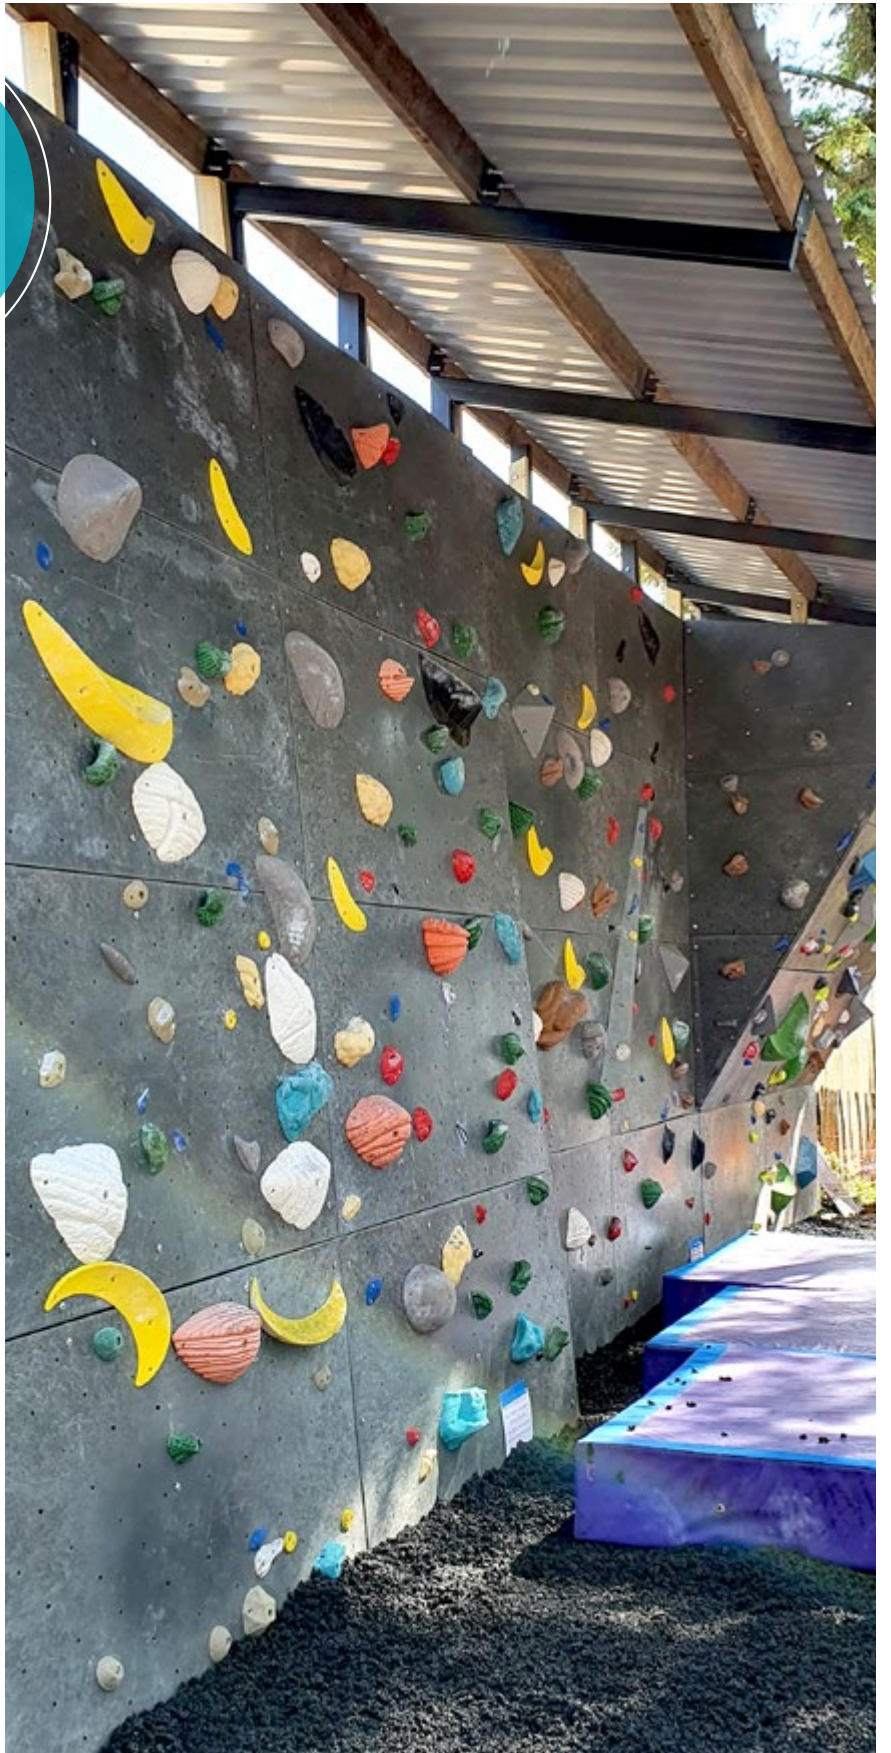

Available in the following colour:

grey / brown

Soooo versatile

As easy  
to process  
as wood

## Inspiration

Let your imagination run wild

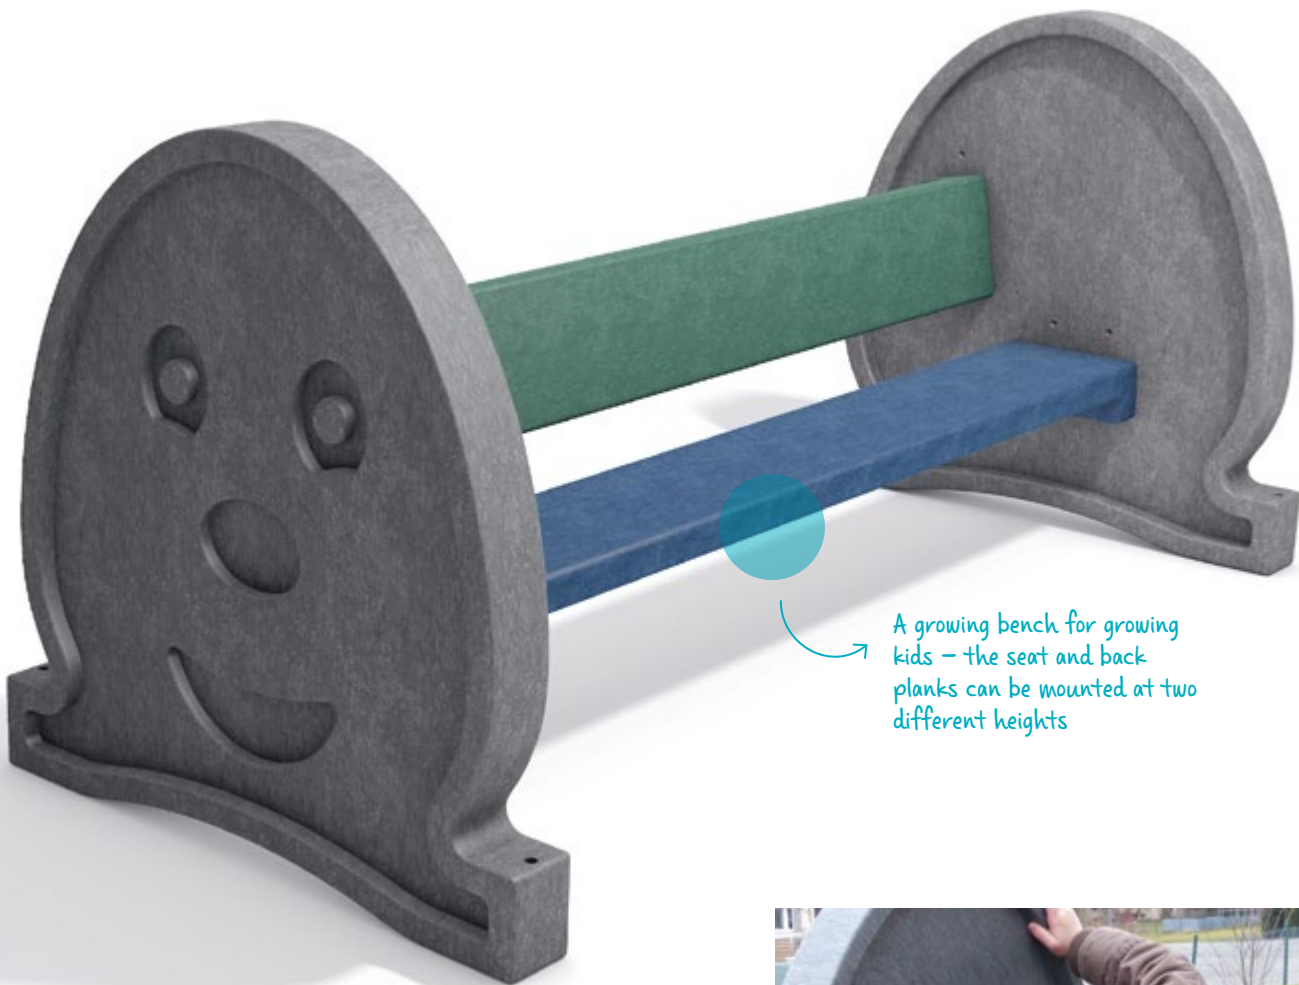

Basic elements like posts, palisades, profiles, planks, beams and panels can be used to build exciting playground equipment. hanit, a weatherproof and universal material, opens up possibilities which are simply unlimited, from barefoot paths to water playground equipment.

# When it's time for a break...

## The indestructible all-rounders

Children's furniture made of hanit is the perfect choice when fun and safety are a top priority. Our children's furniture is highly durable and designed to meet children's needs. The edges are rounded to avoid injuries, it never splinters and is completely non-toxic.

### Pippolino children's bench

- Dimensions (W × H × D): 150 × 70 × 68 cm
- Seat height: can be set at 25 or 34 cm
- 2 Classic bench planks, 138 × 4 cm, Seating plank width: 19 cm, back plank width: 17 cm
- Supplied as construction kit, assembly instructions and materials are included

Available in the following colour:

grey / blue / green

## Forio children's picnic bench

Available in the following colours:

brown      grey / green      grey / blue      grey / red

- Dimensions (W × H × D): 150 × 57 × 108 cm
- Seat height: 34 cm, tabletop: 150 × 60 cm, table height: 57 cm
- 2 bench planks: 150 × 19 × 4 cm, 1 tabletop: 150 × 60 × 8 cm
- Optional extras: floor anchor

The perfect addition

## Forio backrest

- Dimensions incl. angle (W × H × D): 150 × 35 × 20 cm
- Dimensions of picnic bench with backrests mounted on both sides (H × D): 60 × 125 cm
- 2 galvanised angled brackets
- Assembly materials included
- Colours can be combined freely

Available in the following colours:

brown      grey / green      grey / blue      grey / red

All products are available separately – meaning lots of different colour combinations are possible

The Canetti children’s set has been specially developed for the needs of children. The seat height of 34 cm and the wide supporting legs make the benches extremely stable. The closed tabletop is perfect for all different activities, such as painting, crafts, building or a picnic. The relatively light weight makes the set transportable and increases the usage value.

### Canetti children’s set

- Set dimensions (W × H × D): 150 × 63 × 160 cm
- Seat height: 34 cm, table height: 57 cm
- 6 bench planks: 150 × 8 × 4.7 cm, Premium (with backrest)
- 3 bench planks: 150 × 8 × 4.7 cm, Premium (without backrest)
- Closed tabletop, table surface: 150 × 60 cm
- Optional extras: floor anchor
- All products available separately

Available in the following colours:

brown

grey / green

grey / blue

grey / red

An eye-catcher at any playground. The cheeky design of this set puts you in a good mood as soon as you look at it – it's fun to sit down here. The Calero children's bench would be a perfect addition to Villa Villekulla. And because of the amount of rough and tumble that goes on, we have rounded the edges. This is why Calero is impressive in every respect.

Simply  
modern

Available in the following colours:

grey / blue

green / blue / red

## Calero children's bench

- Dimensions (W × H × D): 150 × 34 × 28 cm
- 3 profiles: 132 × 9 × 9 cm
- Extremely robust and durable with steel reinforcement
- Supplied as a construction kit, including assembly materials
- Optional extras: floor anchor

Available in the following colours:

grey / blue

green / blue / red

## Calero children's table

- Dimensions (W × H × D): 150 × 57 × 47 cm
- 5 profiles: 132 × 9 × 9 cm
- Quick assembly – only three components
- Supplied as a construction kit, including assembly materials
- Optional extras: floor anchor

## Collodi skater bench

- Dimensions (W × H × D): 200 × 78 × 27.5 cm
- 1 seating plank: 200 × 27.5 × 6.5 / 5.5 cm  
Seat height: 78 cm
- Perfect leaning height
- For burying, with extended feet

Available in the following colour:

brown

Practise in the skate park and watch the others perform. The best place to do this from is our “Collodi” bench. For leaning on, sitting on and dangling your feet from.

Anyone can just sit on a park bench normally, so why not design a casual bench especially for young people? A bench with a backrest that’s fun to sit on, and also really comfortable.

Sitting on the backrest!

- Dimensions (W × H × D): 200 × 74 × 72 cm
- Seating surface height: 45 cm, backrest seating height: 81 cm
- 3 bench planks: 200 × 17 × 4 cm, Classic
- 2 bench planks: 200 × 12 × 4 cm, Classic
- For burying, with extended feet
- Backrest intentionally developed as seating

## Tremezzo bench for teenagers

Available in the following colours:

brown

grey / green / blue

# Sustainable outdoor furniture

## One-off investment – ongoing benefits

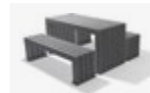

Benches, tables and optional extras for perfect outdoor settings. With hanit products, maintenance and storage are a thing of the past. Whether it's for a daycare centre, a playground or a school, our hanit recycled plastic benches can now be found across a whole range of public spaces. Because the robust material is unbeatable, particularly in locations where outdoor furniture is subject to severe wear and tear, hanit recycled plastic is weatherproof, UV-resistant and unbreakable and is simply ideal for using outdoors all year round.

### Calero series

- Installation area (W × H × D): 150 × 75 × 174 cm
- Seat height: 45 cm, tabletop: 150 × 67 cm, table height: 75 cm
- 8 bench profiles + 7 table profiles: 132 × 9 × 9 cm
- Durable and rot-proof
- Optional extras: floor anchor

Available in the following colours:

grey

brown

anthracite

anthracite / grey

anthracite / brown

### Calero bar

- Bar table dimensions (W × H × D): 150 × 110 × 67 cm, 7 profiles: 132 × 9 × 9 cm
- Bar stool dimensions (W × H × D): 50 × 80 × 38 cm, 4 profiles: 32 × 9 × 9 cm
- Modern cube shape
- Heavy dead weight prevents theft
- Optional extras: floor anchor

Available in the following colour:

grey

Goes great  
with our  
Collodi skater bench

Sit and lay comfortably on this sun lounger. It's even comfortable to share, because there's room for one more – or even the whole family. The special wave shape of the lounger offers the very highest level of comfort. It's made of our recycled hanit plastic, is weatherproof, doesn't splinter, is non-toxic and doesn't need to be weatherproofed or painted.

Available in the following colours:

grey / brown

grey / green

grey / blue

Quick and easy to assembly anywhere as a construction kit

Ergonomic lounge shape for perfect relaxation

## Aveto sun lounger

- Dimensions (W × H × D): 150 × 119 × 165 cm
- 21 bench planks: 150 × 8 × 4.7 cm, Premium
- No need to dismantle and store the furniture in winter
- Durable, rot-proof and stable
- Optional extras: floor anchor

## Piccadilly bench

- Dimensions (W × H × D): 150 / 200 × 80 × 65 cm
- Seat height: 45 cm
- 5 bench planks: 150 / 200 × 12 × 4.7 cm, Premium
- Inner reinforcement
- Optional extras: floor anchor and armrests
- 150 cm width only available in brown

High-quality finish with no maintenance

Available in the following colours:

## Tarlo bench

Integrated armrests and higher seating position

- Dimensions (W × H × D): 160 × 95 × 57.5 cm
- Seat height: 52 cm
- 6 bench planks: 150 × 12 × 4.7 cm, Premium
- The first plank is angled for comfort

Available in the following colours:

grey / brown

## Accessories: floor anchor

Depending on stocks, supplied in

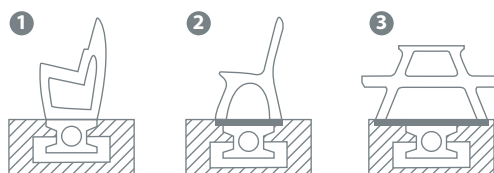

grey

brown

- Secure and stable assembly
- Three versions available (depending on bench model)

## Serengeti picnic bench

- Dimensions (W × H × D): 200 × 76 × 174 cm
- 6 bench planks: 200 × 10 × 4.7 cm, Premium
- 6 table planks: 200 × 12 × 4.7 cm, Premium
- Optional: Only available in brown with extended tabletop  
Dimensions (W × H × D): 240 × 76 × 174 cm
- 5 table planks: 240 × 14 × 4 cm, Classic
- Seat height: 46 cm, tabletop: 200/240 × 77 cm, table height: 76 cm
- Optional extras: floor anchor

Optional: With extended tabletop

Available in the following colours depending on the model:

brown

grey / green

grey / green

grey / red

## Tivoli series

- Dimensions (W × H × D): 150/200 × 80 × 70 cm
- Seat height: 45 cm, tabletop: 150/200 × 70 cm, table height: 75 cm
- 8 bench planks: 150/200 × 10 × 4.7 cm, Premium
- 5 table planks: 150/200 × 12 × 4.7 cm, Premium
- Optional extras: floor anchor and armrests
- 150 cm width only available in brown

# A new approach to group work

## Our outdoor picnic benches

Our picnic benches have proven themselves over decades of use. The material characteristics of hanit recycled plastic result in products that are robust and durable. They're tough, maintenance-free and blend seamlessly into any environment. That's why our recycled products delight all around, with a great look and a great price.

Study  
outdoors

### Stelvio picnic bench

- Dimensions (W × H × D): 252 × 75 × 250 cm
- Seat height: 45 cm, tabletop: 150 × 150 cm, table height: 75 cm
- 12 bench planks + 13 table planks: 150 × 10 × 4.7 cm, Premium
- Galvanised steel substructure
- Seats 12 people

Available in the following colour:

brown

### Scori litter bin

- Dimensions: Ø 42 cm, height: 54 cm
- Capacity approximately 55 litres
- Optionally available with wire basket or a clamping ring

Available in the following colour:

brown

# Bench planks made of hanit

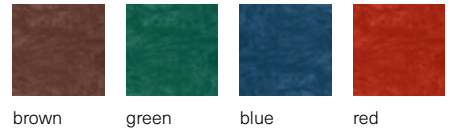

## For flexible, versatile solutions

Our bench planks are ideal for equipping existing substructures, either for renovation or new constructions. They are suitable for designing seating in sports facilities, open-air theatres and schoolyards or for using concrete bases, U-stones and gabions as benches. The internal or milled-in reinforcement increase the stability considerably.

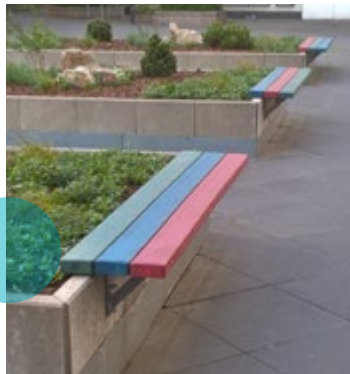

- With single or double reinforcement
- Lengths: from 150 to 240 cm
- Widths: from 5.5 to 19 cm
- Thickness: from 4 to 4.7 cm
- For creative seating

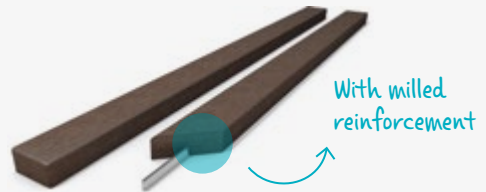

Available in the following colours depending on the model:

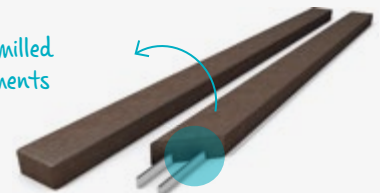

Reinforcement means increased spans are possible

### Classic bench plank

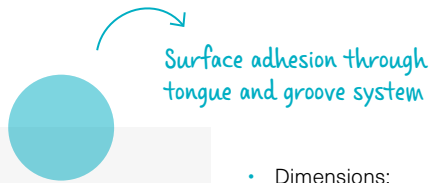

With two milled reinforcements

### Premium bench plank

## Privacy screen

- Dimensions:  
Tongue and groove boards 190 cm long, 3.8 cm thick, 13 cm wide  
Posts (W × L × D): 16 × 250 × 12 cm
- Panel length: 200 cm (axis dimension)
- Panel height: 195 cm  
15 tongue and groove boards per panel
- Steel reinforced posts including cover plates

Posts and tongue and groove boards are available in the following colour:

brown

Tongue and groove boards are also available in the following colour:

grey

The supporting structure of this popular privacy screen system is formed by sturdy reinforced plastic posts, which come in panel, corner or end posts covered with a post cap. The tongue and groove boards are simply inserted into the solid pre-grooved supports to form a perfect bond. The lower plank is stabilised and guided by a central support.

## Pales and posts

Available in the following colours:

grey

brown

- Pale dimensions: 2 × 6 cm and 3 × 10 cm, lengths: from 60 to 150 cm
- Post dimensions: 9 × 9 cm, lengths: from 100 to 200 cm
- No more painting or varnishing
- No splinters, no sharp edges
- Permanently weatherproof

## Outdoor classrooms

Just go outside!

Be it a theatre production or teaching – school is much more fun outside. And weatherproof furniture lasts for longer than a typical school bench.

## Our quality pledge – perfect on sustainability and product performance

Our hanit recycled products stand for top quality, safety and the responsible handling of natural resources. Instead of primary raw materials such as crude oil, we only use plastic from household and production waste to produce the recycled material. hanit recycled plastic is therefore made from 100% recycled plastic and is also 100% recyclable. That is one of the reasons why our products have been awarded the Blue Angel, the ecolabel of the German government. It certifies that they conform to very high environmental, health and performance standards over their entire service life. hanit recycled plastic is extremely resilient and extremely durable - also an important point in terms of sustainability, which for us starts with the quality of our products.

We ensure the high quality of our products by regular Material testing through internal and external quality controls as well as independent certified testing laboratories.

Therefore, our material hanit is, for example, certified as non-toxic according to DIN EN 71-3.

Our range of recycled products guarantees maximum safety for the kids and teens using them, as well as for the buyer, because we offer a full 20-year warranty on the majority of our products – for an all-round good feeling.
